EVERYTHING HERBAL

by Cheryl Jabz

Cheryl's Tips for HERBAL WREATH Making

1. **Start with a sturdy base** — grapevine, wire, or straw wreath forms work well.

2. **Dry herbs first** — let herbs dry fully to help preserve shape, color, and fragrance.

3. **Mix textures and colors** — combine leafy herbs, delicate flowers, and seed heads for interest.

4. **Make small bundles** — gather herbs into mini bunches for easier layering and attaching.

5. **Secure tightly** — use floral wire, jute twine, or hot glue to keep pieces in place.

6. **Balance the design** — step back often and spread herbs evenly for a full, attractive wreath.

7. **Add a finishing touch** — ribbons, dried citrus, cinnamon sticks, or small flowers add charm.

8. **Display with care** — keep wreaths out of direct sun and moisture for longer-lasting beauty.
