Cheryl's Tips for Lantern Making

Make your herbal lanterns beautiful, safe, and long-lasting with these simple tips.

1

Use dried herbs and flowers for best results. Fresh materials can wilt, mold, or burn poorly.

2

Choose a heat-safe base such as mason jars, glass votives, or metal lanterns.

3

For the safest option, use battery LED candles instead of open flames.

4

Press or flatten flowers before applying them for a smoother finish.

5

Use decoupage glue or clear craft adhesive sparingly to secure herbs to glass.

6

Do not overcrowd your design. Leave some clear space so the light can shine through.

7

Add twine, ribbon, or a simple handle for a rustic finishing touch.

8

Display safely on tables, windowsills, patios, or porches away from flammable items.

BONUS IDEAS

Try lavender and chamomile for a calming lantern.

Use pine, cedar, and rosemary for a woodland look.

Add orange peel and cinnamon sticks for a cozy seasonal glow.
